EDUCATION

HUMBOLDT-UNIVERSITÄT ZU BERLIN **Berlin, Germany**
Master of Science in Statistics (2026)

- Joint Masters Program between Humboldt-Universität zu Berlin, Freie Universität Berlin, Technische Universität Berlin, and Charité-Universitätsmedizin
- Specialized in Statistical Inference and Data Science

GEORGIA INSTITUTE OF TECHNOLOGY **Atlanta, Georgia**
Bachelor of Science in Industrial Engineering (2019) **Highest Honors**

- Quality and Statistics Concentration
- ISyE Asia Program **Singapore & China**
  - Attended Shanghai Jiao Tong University and the National University of Singapore
  - Studied Logistics, Financial Data Analysis, and Risk Modeling

RESEARCH & TEACHING

HUMBOLDT-UNIVERSITÄT ZU BERLIN *2025 - 2026*

- Taught the tutorial section of Multivariate Statistical Analysis, an advanced statistics class for master's students, which includes preparing materials, weekly classes, etc.
  - Anonymous student evaluation excerpt: "Didactical wonder. [Sydney] provided exactly the explanation I needed. She does not only have an excellent handle of the material covered but 100% understands why people don't understand and how to help them. Best course [I've] taken so far."
  - Full evaluation results available upon request.
- Conduct statistical research using neural networks to predict attributes based on the movement of a computer mouse in R

INDEPENDENT RESEARCHER (working with HELMHOLTZ – UFZ) *2023 - 2025*
Computational Land Management Researcher

- Lead Author of "Distilling the Pareto optimal front into actionable insights" https://doi.org/10.1016/j.envsoft.2025.106508
- Developed efficient, effective, and reusable code in Python and R to cluster sets of Pareto-Optimal solutions generated by multi-objective genetic algorithms (MOGA)
- Ran analytics on sets of Pareto-Optimal solutions to, for example, check for correlation between decision space variables
- Investigated ways to calculate clusters' representative solutions as well as the most efficacious way to display said solutions to decision-makers

GEORGIA INSTITUTE OF TECHNOLOGY
Undergraduate Teaching Assistant for Methods of Quality Improvement *2019*

- Served as sole teaching assistant for the 60+ students taking Methods of Quality Improvement, an essential course for a Quality & Statistics concentration
- Developed answer keys and graded 10 homework, 12 labs, and 2 exams. Held four office hours a week and attended classes periodically to help students complete labs

Tutor for ISyE Department *2018 - 2019*

- Tutored students taking Engineering Optimization and related major classes, including Probability with Applications and Basic Statistical Methods

Student Researcher - Public Policy Department *2015 - 2016*

- Collected and organized mass information from written sources using a combination of filtering programs and reading, then analyzed data using Excel and other programs
- Worked on projects related to state strategic planning and job progression

SOUTH CAROLINA COUNCIL ON ECONOMIC EDUCATION
Research Intern *2014*

- Conducted research in the field of economic education to evaluate the usefulness of online education assistance resources

- Wrote a research paper and developed a list of the most useful economic education support resources for the classroom *Analysis And Recommendations Of Online Learning Resources For Teachers Who Lead Economics And Financial Literary Courses In K-12 Schools*
- Presented at the South Carolina Junior Academy of Science in 2015 (First place in written award category)

PUBLICATIONS

Wittekind, C. I. H., Witing, F., **White, S. E.**, Schürz, C., Forio, M. A. E., Shore, M., Farkas, C., Futter, M., Collentine, D., Sanguanini, L., Kolcsár, R. A., Szabó, B., Kassai, P., Volk, M., & Strauch, M. (2026). ParetoPick-R: An interactive tool for boosting the interpretability of multi-objective optimisation outputs. *Environmental Modelling & Software*, Article 107180. https://doi.org/10.1016/j.envsoft.2026.107180

White, S. E., Witing, F., Wittekind, C. I. H., Volk, M., & Strauch, M. (2025). Distilling the Pareto optimal front into actionable insights. *Environmental Modelling & Software, 191*, Article 106508. https://doi.org/10.1016/j.envsoft.2025.106508

PROJECTS

Master's Thesis - Multi-scale Ecological Data in Hidden Markov Models:

- Examines approaches for handling multi-temporal data in Hidden Markov Models, with applications to animal movement
- Code written in R and will be made available on GitHub

Interactions and Dependency between ringed plovers and sanderlings on Helgoland:

- Applies Generalized Linear Mixed Models (GLMMs) to uncover associations between shorebirds
- Code written in R and will be made available on GitHub

CORPORATE EXPERIENCE

WAYFAIR **Berlin, Germany**

Head of EU B2B Marketing *January 2025 - March 2026*

- Managed and optimized B2B marketing activities across various marketing channels (i.e., Paid Search, Email) ensuring alignment with business objectives
- Analyzed, identified, and prioritized the most promising acquisition and brand growth levers, based on data and market trends
- Built and scaled user acquisition strategies across marketing areas such as influencers, content, brand activations, partnerships, and more
- Deep analysis of acquisition funnels, user behavior, and dynamics to spot opportunities and optimize ROI using Python and SQL
- Manage cross-functional projects to drive growth of the B2B customer base
- Worked with Data Science and Martech teams to refine machine learning-based bidding strategies, automation, and attribution models
- Stayed ahead of platform updates, privacy regulations, and measurement changes, including GA4, server-side tracking, and first-party data strategies

Senior Marketing Analyst *August 2022-December 2024*

- Coded and maintained a bidding algorithm in Python to utilize past performance data to set product bids for numerous vendors
- Developed infrastructure to monitor and analyze marketing campaigns to increase trend visibility, as well as reduce manual time and effort spent on these practices
    - Combined 5 data sources using SQL to create a source of truth table for all Facebook advertising metrics at a granularity not yet achieved
    - Automated promotional results readouts by connecting Google Sheets to the Wayfair Database and creating parameters that could be manipulated within sheets, saving 4 hours of manual work per promotion
- Ran A/B Statistical Tests or Pre/Post Analyses to ensure strategic advertising decisions were backed with data
- Owned the strategic decisions to optimize ROI for a 1-million-dollar budget

Advanced Analytics and Insights **Boston, MA**

Senior Analyst *(Feb 2022 – Aug 2022),* ***Analyst*** *(Aug 2020 – Feb 2022)* *August 2020-September 2022*

- Ran A/B Statistical Tests on Wayfair's website and mobile apps to deliver recommendations about the most effective user-facing experiences or backend components

- Influenced key strategic decisions by performing statistical analyses and running advanced statistical models, then sharing insights with project managers
- Monitored Key Performance Indicators and built infrastructure to help investigate anomalous trends
    - Developed Dashboards in Looker and Data Studio to monitor trends
    - Coded script in Python that scraped performance charts from Looker and automatically created a Google Slides Presentation, thus eliminating 3 hours of manual work per week
- Contributed to the team culture and the growth of colleges by actively participating in the Culture and Communication group, leading three different onboarding sessions for each set of new hires, creating daily WFH challenges for the group, and participating as a member of the Onboarding Leadership Team

SKILLS

Software/Programming Experience: Python, R, SQL (Vertica, GBQ, MySQL), Looker, Data Studio, Excel (macros, arrays, pivot tables, etc.), HTML
Hobbies: Triathlons, Ornithology, Hiking, Learning German (Completed B2)
